# **SAFETY DATA SHEET**

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name	Castrol EDGE 5W-30 C3
Product code	468548-DE01
SDS no.	468548
Product registration number	Not applicable
Product type	Liquid.
1.2 Relevant identified uses of	of the substance or mixture and uses advised against
Use of the substance/	Engine Oils.
mixture	For specific application advice see appropriate Technical Data Sheet or consult our company representative.
1.3 Details of the supplier of	the safety data sheet
Supplier	Castrol
	En division inom Nordic Lubricants AB Box 491 04
	100 28 Stockholm
	Telefon : +46 (0)8-441 11 00 Fax.: +46 (0)8-651 01 35
E-mail address	MSDSadvice@bp.com
	Weboadvice@bp.com
1.4 Emergency telephone nu	mber
EMERGENCY TELEPHONE NUMBER	Carechem: +44 (0) 1235 239 670 (24/7)
SECTION 2: Hazards	identification
2.1 Classification of the subst	tance or mixture
Product definition	Mixture
	Regulation (EC) No. 1272/2008 [CLP/GHS]
Not classified.	

See sections 11 and 12 for more detailed information on health effects and symptoms and environmental hazards.

#### 2.2 Label elements

Signal word	No signal word.
Hazard statements	No known significant effects or critical hazards.
Precautionary statements	
Prevention	Not applicable.
Response	Not applicable.
Storage	Not applicable.
Disposal	Not applicable.
Supplemental label elements	Not applicable.
Special packaging requirement	<u>nts</u>
Containers to be fitted with child-resistant fastenings	Not applicable.
Tactile warning of danger	Not applicable.

#### 2.3 Other hazards

ſ	Product name	Castrol EDGE 5W-30 C3		Product code	468548-DE01	Page: 1/10	
	Version 2	Date of issue 1 August 2016	Format	Sweden	Language	ENGLISH	
				(Sweden)			

## **SECTION 2: Hazards identification**

Other hazards which do	Defatting to the skin.
not result in classification	USED ENGINE OILS
	Used engine oil may contain hazardous components which have the potential to cause skin
	cancer

See Toxicological Information, section 11 of this Safety Data Sheet.

## **SECTION 3: Composition/information on ingredients** Mixture

#### Substance/mixture

Chemically modified base oil Proprietary performance additives.

Product/ingredient name	Identifiers	%	Regulation (EC) No. 1272/2008 [CLP]	Туре
Base oil - unspecified	Varies - See Key to abbreviations	≥50 - ≤75	Not classified.	[2]
Base oil - unspecified	Varies - See Key to abbreviations	≤5	Asp. Tox. 1, H304	[1] [2]
Lubricating oils (petroleum), C20-50, hydrotreated neutral oil-based	REACH #: 01-2119474889-13 EC: 276-738-4 CAS: 72623-87-1 Index: 649-483-00-5	≥10 - ≤25	Asp. Tox. 1, H304	[1] [2]
bis(nonylphenyl)amine	REACH #: 01-2119488911-28 EC: 253-249-4 CAS: 36878-20-3	≤3	Aquatic Chronic 4, H413	[1]

#### See Section 16 for the full text of the H statements declared above.

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

### SECTION 4: First aid measures

#### 4.1 Description of first aid measures

In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
If inhaled, remove to fresh air. Get medical attention if symptoms appear. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.
Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
No action shall be taken involving any personal risk or without suitable training.

#### 4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

#### 4.3 Indication of any immediate medical attention and special treatment needed

Notes	to	physician	

Treatment should in general be symptomatic and directed to relieving any effects. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.

Product name	Castrol EDGE 5W-30 C3
Version 2	Date of issue 1 August 2016

# **SECTION 5: Firefighting measures**

-	-
5.1 Extinguishing media	
Suitable extinguishing media	In case of fire, use foam, dry chemical or carbon dioxide extinguisher or spray.
Unsuitable extinguishing media	Do not use water jet.
5.2 Special hazards arising fro	om the substance or mixture
Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous combustion products	Combustion products may include the following: carbon oxides (CO, CO₂) (carbon monoxide, carbon dioxide) nitrogen oxides (NO, NO₂ etc.)
5.3 Advice for firefighters	
Special precautions for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

# **SECTION 6: Accidental release measures**

6.1 Personal precautions, prote	ctive equipment and emergency procedures
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Put on appropriate personal protective equipment.
For emergency responders	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for co	ntainment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions. See Section 13 for additional waste treatment information.

# SECTION 7: Handling and storage

7.1 Precautions for safe ha	ndling			
Protective measures	Put on appropriate perso	nal protective equipment.		
Advice on general occupational hygiene	stored and processed. W	king should be prohibited in areas /ash thoroughly after handling. Re ore entering eating areas. See als easures.	emove contaminated	clothing and
7.2 Conditions for safe storage, including any incompatibilities	from incompatible materia container tightly closed a be carefully resealed and	local regulations. Store in a dry, c als (see Section 10). Keep away find sealed until ready for use. Con kept upright to prevent leakage. S ise with this product. Do not store	rom heat and direct s tainers that have bee Store and use only in	unlight. Keep n opened must equipment/

# SECTION 8: Exposure controls/personal protection

Skin protection Hand protection	General Information:
nand protection	
	Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves
	depends upon the chemicals being handled, and the conditions of work and use. Most glove
	provide protection for only a limited time before they must be discarded and replaced (even t best chemically resistant gloves will break down after repeated chemical exposures).
	Gloves should be chosen in consultation with the supplier / manufacturer and taking account a full assessment of the working conditions.
	Recommended: Nitrile gloves. Breakthrough time:
	Breakthrough time data are generated by glove manufacturers under laboratory test conditio and represent how long a glove can be expected to provide effective permeation resistance.
	is important when following breakthrough time recommendations that actual workplace
	conditions are taken into account. Always consult with your glove supplier for up-to-date
	technical information on breakthrough times for the recommended glove type. Our recommendations on the selection of gloves are as follows:
	Continuous contact:
	Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves
	can be obtained. If suitable gloves are not available to offer that level of protection, gloves with shorter
	breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.
	Short-term / splash protection:
	Recommended breakthrough times as above.
	It is recognised that for short-term, transient exposures, gloves with shorter breakthrough tin may commonly be used. Therefore, appropriate maintenance and replacement regimes mus be determined and rigorously followed.
	Glove Thickness:
	For general applications, we recommend gloves with a thickness typically greater than 0.35
	It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependen on the exact composition of the glove material. Therefore, glove selection should also be ba on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into acco
	to ensure selection of the most appropriate glove for the task. Note: Depending on the activity being conducted, gloves of varying thickness may be require
	for specific tasks. For example:
	Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manua
	dexterity is needed. However, these gloves are only likely to give short duration protection a would normally be just for single use applications, then disposed of.
	Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as we
	as a chemical) risk i.e. where there is abrasion or puncture potential.
Skin and body	Use of protective clothing is good industrial practice.
	Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling thi
	product.
	Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regu
	basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a
	risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.

			(Sweden)		

## **SECTION 8: Exposure controls/personal protection**

<u>Refer to standards:</u>	Respiratory protection: EN 529 Gloves: EN 420, EN 374 Eye protection: EN 166
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

## **SECTION 9: Physical and chemical properties**

9.1 Information on basic physical a	and chemical properties
Appearance	
Physical state	Liquid.
Colour	Not available.
Odour	Not available.
Odour threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Pour point	-42 °C
Flash point	Issed cup: 204°C (399.2°F) [Pensky-Martens.]
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Density	<mark>≮</mark> 1000 kg/m³ (<1 g/cm³) at 15°C
Solubility(ies)	insoluble in water.
Partition coefficient: n-octanol/ water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic: 69.6 mm²/s (69.6 cSt) at 40°C Kinematic: 12.06 mm²/s (12.06 cSt) at 100°C
Explosive properties	Not available.
Oxidising properties	Not available.

#### 9.2 Other information

No additional information.

## **SECTION 10: Stability and reactivity**

10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.
10.2 Chemical stability	The product is stable.
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
10.4 Conditions to avoid	Avoid all possible sources of ignition (spark or flame).
10.5 Incompatible materials	Reactive or incompatible with the following materials: oxidising materials.
10.6 Hazardous decomposition products	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

## **SECTION 11: Toxicological information**

#### 11.1 Information on toxicological effects

Acute toxicity estimates

	Route	ATE value	
Not available.			
Information on likely routes of exposure	Routes of entry anticipated: Dermal, Inhalation	n.	
Potential acute health effec	<u>its</u>		
Inhalation	Exposure to decomposition products may cause a health hazard. Serious effects may be delayed following exposure.		
Ingestion	No known significant effects or critical hazards	S.	
Skin contact	Defatting to the skin. May cause skin dryness	and irritation.	
Eye contact	No known significant effects or critical hazards	S.	
Symptoms related to the pl	nysical, chemical and toxicological characterist	<u>tics</u>	
Inhalation	No specific data.		
Ingestion	No specific data.		
Skin contact	Adverse symptoms may include the following: irritation dryness cracking		
Eye contact	No specific data.		
Delayed and immediate effe	ects as well as chronic effects from short and lo	ong-term exposure	
Inhalation	Overexposure to the inhalation of airborne droplets or aerosols may cause irritation of the respiratory tract.		
Ingestion	Ingestion of large quantities may cause nause	a and diarrhoea.	
Skin contact	Prolonged or repeated contact can defat the skin and lead to irritation and/or dermatitis.		
Eye contact	Potential risk of transient stinging or redness if accidental eye contact occurs.		
Potential chronic health eff	ects		
General	engine oils during use. Used engine oil may c	tion of internal combustion engines contaminate contain hazardous components which have the rolonged contact with all types and makes of usec gh standard of personal hygiene maintained.	
Carcinogenicity	No known significant effects or critical hazards	S.	
Mutagenicity	No known significant effects or critical hazards	S.	
Developmental effects	No known significant effects or critical hazards	S.	
Fertility effects	No known significant effects or critical hazards	S.	

# **SECTION 12: Ecological information**

12.1 Toxicity

Environmental hazards

Not classified as dangerous

#### 12.2 Persistence and degradability

Partially biodegradable.

#### 12.3 Bioaccumulative potential

This product is not expected to bioaccumulate through food chains in the environment.

12.4 Mobility in soil	
Soil/water partition coefficient (Koc)	Not available.
Mobility	Spillages may penetrate the soil causing ground water contamination.

#### 12.5 Results of PBT and vPvB assessment

PBT	Not applicable.
vPvB	Not applicable.

#### **12.6 Other adverse effects**

ſ	Product name	Castrol EDGE 5W-30 C3		Product code	468548-DE01	Page: 7/10
	Version 2	Date of issue 1 August 2016	Format	Sweden	Language	ENGLISH
				(Sweden)		

### **SECTION 12: Ecological information**

Other ecological information

Spills may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired.

## **SECTION 13: Disposal considerations**

13.1 Waste treatment metho	ods
Product	
Methods of disposal	Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.
Hazardous waste	Yes.

#### European waste catalogue (EWC)

Waste code	Waste designation	
13 02 08*	other engine, gear and lubricating oils	

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

#### Packaging Methods of disposal Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations. This material and its container must be disposed of in a safe way. Empty containers or liners **Special precautions** may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Methods of disposal The regulations regarding manufacturers' responsibility for packaging material waste is regulated in "Förordningen om producentansvar för förpackningar". Packaging materials are to be reused or recycled in accordance with the goals outlined in this regulation. The company complies with this manufacturer's responsibility through its association with REPA, which is a subsidiary company of four materials handling companies. The materials handling companies collect, remove and process used and sorted packaging materials through the employment of contractors. Questions regarding collection of packaging materials on a local basis may be directed to the materials company and its contractors. For further information, contact REPA, www.repa.se. Instructions for emptying steel drums: Turn the drum so that the bunghole faces down, the 2" bunghole lowest and inclined somewhat, about 10 degrees, until the drum has dripped-dry. Emptied drums should be sent to an authorized recycler. Handling of plastic packaging materials: Put the emptied packaging material upside down to drain off any remaining fluid, until the material is dripped-dry. Collect and employ the remaining contents in the process where the product is used, or send it for special handling. Sort the packaging material, with lid/cork removed, as required for "Hård Plastförpackning" (HARD

PLASTIC PACKAGING MATERIALS).

Handling of metal packaging materials (not including steel drums).: Emptied packaging material, containing a maximum of 1% pollutants, should be sorted and sent to one of Metallkretsen's temporary storage depots; See the WEB site: www.metallkretsen.se.

#### Notice to reader

All reasonably practicable steps have been taken to ensure this data sheet and the health, safety and environmental information contained in it is accurate as of the date specified below. No warranty or representation, express or implied is made as to the accuracy or completeness of the data and information in this data sheet.

The data and advice given apply when the product is sold for the stated application or applications. You should not use the product other than for the stated application or applications without seeking advice from BP Group.

It is the user's obligation to evaluate and use this product safely and to comply with all applicable laws and regulations. The BP Group shall not be responsible for any damage or injury resulting from use, other than the stated product use of the material, from any failure to adhere to recommendations, or from any hazards inherent in the nature of the material. Purchasers of the product for supply to a third party for use at work, have a duty to take all necessary steps to ensure that any person handling or using the product is provided with the information in this sheet. Employers have a duty to tell employees and others who may be affected of any hazards described in this sheet and of any precautions that should be taken. You can contact the BP Group to ensure that this document is the most current available. Alteration of this document is strictly prohibited.
